

# 昔の姿に一番近い場所

As close as possible to the landscape of old

## 荒川太郎右衛門地区 自然再生事業

Arakawa Tarouemon Area  
Nature Restoration Project

現在の旧流路は止水の環境となっており、ヒシ、ヨシ、アサザなどの水生・湿生植物や、湿地を好む動物が生息・生育しています。  
The current former river channel has become a still-water environment: it provides a habitat for aquatic/wetland plants such as water chestnut, reeds, and floating heart, and for creatures that prefer wetlands.
