

中池

Naka-ike Pond

荒川太郎右卫门地区
自然再生项目
Arakawa Tarouemon Area
Nature Restoration Project

- 附近为旧河道及其周边自然保护实施区。
- 沿旧河道分布有橡树、朴树、糙叶树等河岸林，包括附近草地在内，栖息着种类繁多的生物。

This is an area in which initiatives are underway to conserve the former river channel and the surrounding natural environment.
Along the former river channel there are forests of oak, hackberry and muku trees; these and the nearby grasslands are habitats for a variety of living creatures.
