

“Inarigawa Sabo Dams”

Sabo dams have been constructed since 1926 to protect Nikko City from the Large-scale collapse at the upper reaches of the Inari River and large-scale collapse at Nanatakisawa. The old sabo dam is recognized as a registered tangible cultural property of the country and a civil heritage recommended by the Japan Society of Civil Engineers.

稲荷川砂防堰堤群

稲荷川上流の大鹿落し、七滝沢の大規模崩壊地の土砂流出から日光市を護るために大正7年より砂防堰堤を建設し、古い堰堤は国による登録有形文化財、土木学会推奨の土木遺産に認定されています。
